

P4 PV Performance Certificate

Certificate nr: 064318/04252017

Certificate valid until: 25 April 2018

Date issued: 10 May 2017

A Contractor:	
A.1 Trading name	Sample installer
A.2 Historically involved with at least(according to available data)	25 Solar PV Systems
A.3 Combined generating capacity at least(according to available data)	100kWp
A.4 PV P4 Performer Status*	Safe
A.5 Overall P4 performance score**	88,49
A.6 Certificate checked & issued by:	P4001

The P4 score is a risk indicator; measuring a solar contractor's risk based on theoretical knowledge, feedback from clients, industry activity and PV installation experience. Contractors scoring 50 points and above as per item A.5 Overall performance score should be considered for PV projects as they have displayed good theoretical knowledge as well as agreeing; to do solar PV installations, testing and commissioning based on IEC standards and best practice.

In short the P4 certificate is an indicator of whether the contractor has the theoretical knowledge and possible experience to complete proposed solar PV projects whilst maintaining a high standard of design integrity, customer satisfaction and installation best practice.

This certificate, score and platform is not a guarantee that the project will be completed successfully and does not verify a contractor's financial bankability. PQRS & pqrsafrica.com cannot be held liable for projects not completed successfully as the procurement, installation & project management service falls outside of the scope of the P4 platform.

A standard due diligence check is also recommended prior to any contractor being appointed.

Zone Descriptor	Score and code	Description
Safe Zone	Code (AN) 80 - 100%	Contractors have high client, technical knowledge and evaluation scores.
Grey Zone	Code (BN) 50 - 79%	Contractor score is not sufficient to move into the 'safe zone'. This may be new companies or companies working on improving their score.
Active Zone	Code (CN) 0 - 49%	No projects or activities have been logged for periods exceeding 12 months or activities have scored less than the required 50%. Risks associated with contractors in this range may be too high.
NV Zone (Not Visible)	Code (NV) 0 - 49%	This is the category for contractors who are known to have installed PV systems and who do not have an active presence in the PQRS platform, or; no PV projects or activities have been logged for periods exceeding 24 months.

This certificate has been issued, subject to the terms and conditions of the P4 PV quality assurance platform as administered by PQRS. The P4 platform is based on IEC standards and highlights best practice for solar PV contractors.

P4 PV Performance Certificate

Certificate nr: 064318/04252017

Breakdown of contractor's P4 score.	
1	Knowledgable person***
1.1	Name and surname John the installer
1.2	ID nr. 240113 516 908 2
1.3	Knowledgable person online test score (80% minimum pass rate) 89,3%
1.4	Knowledgable person's relationship to contractor (Direct / Indirect) Direct
1.5	Test points awarded (score * 0.375) - Max achievable 37.5 33.49 pts
2	Standards Agreement
2.1	Agreed by John the installer
2.2	Standards agreement points awarded - Max achievable 20 20 pts
3	Latest inspection score
3.1	Means of evaluation (Online or, In person) Online
3.2	Evaluation score 40/50
3.3	Confirmed by Client - Review
3.4	Evaluation points (score * 0.55) - Max achievable 27.5 22 pts
4	Listing of data
4.1	Most recently listed system date (must be within the last 12 months) 26 March 2017
4.2	Listing points awarded - Max achievable 5 5 pts
5	Customer review
5.1	Reviewed by Pete the client
5.2	Review score 4
5.3	Review date 26 March 2018
5.4	Review points awarded (score x 2) - Max achievable 10 8 pts
6	Green card
6.1	Contractor is part of the green card initiative (Yes/No) No
6.2	Green card bonus points awarded - Max achievable 5 0 pts
